

OBSERVA

MONITORING & ANALYSIS

Multiplex Supervisor

NEW
FEATURES

Comprehensive Customisable DAB+ Monitoring Suite

The OBSERVA **Multiplex Supervisor** is the **market leader** for the monitoring and analysis of **DAB+ networks**. A contemporary and practical interface navigates the user through 2 completely **customisable** software applications, providing **assurance** throughout the broadcast chain. Utilising SNMP, **real-time data** and instant alerts, the OBSERVA Multiplex Supervisor delivers a cost-efficient tool for network validation, supervision and **multiplex management** of EDI, ETI and RF.
